Business Insights

1. Revenue Growth & Decline

Revenue increased by 20.46% in 2024, from ₹754.77M to ₹909.22M. In 2025, revenue declined by 12.20% to ₹798.27M. This shows that the strong growth in 2024 was followed by a slowdown in 2025.

2. Target Achievement

The business generated ₹2.46B in revenue and achieved 100.21% of the overall revenue target. Annual target achievement remained close to 100%, increasing slightly from 100.06% in 2023 to 100.39% in 2025.

3. Regional Revenue Concentration

North, West and South together contributed around 80.5% of total revenue. These three regions are the main contributors to overall sales, while Central and East contributed a smaller share.

4. Sales Channel Performance

The Website was the largest sales channel, contributing approximately 50% of total revenue. The Mobile App was the second-largest channel, followed by the Marketplace.

5. Category Revenue Concentration

Laptops, Smartphones and Televisions together contributed around 55% of total revenue. This shows that a small number of major categories contribute a significant share of overall sales.

6. Product Profitability

The products with the highest revenue were not always the products with the highest gross profit. This shows the importance of looking at revenue, gross profit and gross margin together when evaluating product performance.

Business Recommendations

1. Investigate the 2025 Revenue Decline

Review the regions, categories, channels and months that contributed most to the 2025 decline and identify areas where sales can be improved.

2. Monitor Major Revenue Regions

Continue to monitor North, West and South closely, while identifying opportunities to increase sales in Central and East.

3. Maintain Website Performance

The Website is the largest revenue channel. Its performance should be monitored closely while also looking for opportunities to grow the Mobile App and Marketplace channels.

4. Monitor Category Concentration

Track the sales and profitability of major categories such as Laptops, Smartphones and Televisions to manage dependence on a few key categories.

5. Focus on Profitability Along with Revenue

Evaluate products using revenue, gross profit and gross margin together. High-revenue products with lower margins should receive additional attention to improve overall profitability.
